### Introduction

On 11-22-1963, former U.S. president John F Kennedy (known by his initials JFK) was assassinated.

He was on a political trip in Texas, in an open car with his wife Jacqueline Kennedy. There were rifle shots.

After he was shot, he was taken to the hospital, but the wound is so bad that he couldn't make it. While miscellaneous, he was known as the only catholic president, and his age was next to the president Theodore Roosevelt, who was 42, John was 43 at his election time.

There are a lot of doubts about whether the CIA killed JFK or Lee Harvey Oswald.

### The evidence

The lie

Holland

The following text was taken from the lie

“On 2 June 1961, just weeks after the Bay of Pigs debacle, the Senate Internal Security Subcommittee convened to take testimony from Richard M. Helms, then an assistant deputy director of the Central Intelligence Agency. In those halcyon days of the Agency’s relationship with Congress, it was rare for a CIA official to give a presentation that senators had every intention of making public. The subcommittee, dominated by some of the fiercest anti-Communist members of the Senate, undoubtedly wanted to **help repair the Agency’s tarnished image**. The hearing, entitled “Communist Forgeries,” would surely remind Americans of the threat that Communism posed to Western interests and the Agency’s frontline role in containing that threat.[1] “

“Help repair the tarnished image” in your mind should mean they are saying the quiet part out loud.

The image of it was already damaged, especially sense if the CIA mkultra experiments, and other things you might have scene wernt enough, they are accused of (and likely did) kill the former president JFK.

More evidence from the CIA

Mafia and

Thanks to a FOIA (freedom of information act) request, we have gotten more information last year.

The important text will be in bold

First, the CIA proceeds to ask this question, which basically pins the blame on the president.

“And did the ill-fated president seal his own doom with a decision he had made several months before?”

**(N.A.)**

**The CIA suggests here that the president was at fault.**

**Also look at the following line from the PDF.**

**“Members of America's top-secret spy organization and known trig-**

**germen for the Mafia** were reportedly observed on the scene when the

a fatal shooting took place.”

**This suggests that members of the CIA, if not the CIA themselves, had been plotting JFKs downfall for a while.**

**Cnn**

**Let’s now turn to a CNN article which looks more into this.**

**Note**

**Fox will also be heard as both sides need attention**

During the video, Jake Tapper, CNN news guy, interviews Jacqueline Kennedy's X secret service agent, Paul Landis, said the following in the video

For context, this was in reference to the magic bullet theory, in the book, The Final Witness.

Jake Tapper, the man with Paul Landis, had mentioned that there was a completely intact bullet.

Why we're

"You write that you saw 2 bullet fragments sitting in a pool of blood.

Then you say you found an intact bullet sitting in the seat, it was a completely intact bullet. It'd been hidden behind the seat" (Tapper)

It sounds like Mr. Tapper was referring to a bullet that'd been fired, yet was still intact.

That is not a normal bullet, bullets are usually distorted and finished with after being fired.

That means something had to have been done.

As for Fox News...

He said the following in this video.

"There's a 6 year coverup that the Warren Commission was run by

**Allen Dulles, who was the head of the CIA**

**who my uncle fired. Congress found that**

**yeah, it was a plot, it was a conspiracy.**

There were multiple people involved"

**(Kennedy)**

**Finally, the hill.**

**On the the hill article, he said, "I think it's beyond a reasonable doubt at this point" (Kennedy)**

Conclusion

**The CIAs own words, statements from others, and the evidence listed could very well mean the CIA murdered or was involved in the murder of former US president John F Kennedy.**
